Introduction

Standards for Success

Standards for Success is The Department of Housing and Urban Development's (HUD's) data collection and reporting framework for measuring HUD Participants' self-sufficiency and ability to obtain and maintain housing. It is the approach used by HUD programs to report their work. The Standards for Success framework focuses on eighteen (18) indicators aligned to measure Participants' self-sufficiency and quality of life. It provides a common approach for data collection and reporting and new reporting tool.

Standards for Success offers multiple advantages.

| Grantees | Technology | HUD |
|---|---|--|
| Standardized approach to data collection and reporting | Data consolidated into single repository | Stronger capabilities to compare and use data |
| Improved reporting tool | Options for data submission <ul style="list-style-type: none">• Online web form• Data extracts | Program Management Offices select which data elements are relevant to their programs |
| One reporting tool for multiple types of grants | | |
| Option of data extracts from current technology systems | | |
| Protection of privacy of Participants | | |

Standards for Success Indicators - Overview

The Standards for Success eighteen (18) indicators are designed to answer five fundamental questions regarding grant effectiveness:

1. Does the Participant's economic independence and self-sufficiency improve?
2. Does the ability to live independently improve?
3. Does participation reduce homelessness?
4. Does participation in grant-funded housing services improve other quality of life outcomes?
5. Do the grant-funded housing services help Participants meet their housing needs?

The Standards for Success Indicators and related data elements are organized in the following five focus areas: Employment, Financial, Education, Health, and Housing. In addition, the data elements include pertinent Grant Award and Participant information.

| Focus Areas | Standards for Success Indicators |
|-------------|--|
| Employment | <ul style="list-style-type: none"> • Employment rate |
| Financial | <ul style="list-style-type: none"> • Average quarterly earnings |
| Education | <ul style="list-style-type: none"> • Participation rate in Head Start or Pre-K • Participation rate in high school or GED prep • Percent attainment of a degree • Percent attainment of a vocational/occupational license or certificate |
| Health | <ul style="list-style-type: none"> • Percentage with a primary health care provider • Percentage who received routine medical exam in the last 12 months • Percentage with health plan coverage • Percentage with asthma who have asthma-related emergency room visits • Percentage of children with elevated blood-lead level results |
| Housing | <ul style="list-style-type: none"> • Utilization rate of services/programs by homeless individuals • Average time from homelessness to permanent placement • Percentage of chronically homeless that is permanently housed • Percentage in neighborhood of opportunity • Percentage of income spent on housing and transportation • Percentage that improved living situations |

- Household success indicator, the aggregated number of households receiving supportive services, spans all indicators.

The Standards for Success Indicators are based on data elements entered by the Grantees and Service Coordinators. Each data element has a cross reference PRLI Fixed ID to the Participant Record-Level Information (Appendix A).

Data Elements

Grant Award

HUD has awarded your organization funding.

- As a Grantee or Service Coordinator, your organization responsible for providing the services described in your Grant application.
- HUD also requires that you report the benefit of your services to each person who participates in your program.
- This Data Integrity Reference Manual is a reference tool and describes how to accurately collect and report the necessary data.

Grantees' and Service Coordinators' major responsibilities related to Standards for Success are:

Data Integrity – Ensuring the accuracy and consistency of the data you collect

Data Collection – Gathering and inputting information

Data Reporting – Submitting data for informational summaries. HUD will report-out only aggregate data.

Privacy – Protecting the privacy of Participants' health and other personally identifiable information. No personally identifiable information will be reported to HUD.

Feedback – Provide feedback for refining the Standards for Success framework to best serve your Participants' and your needs

The information in this Data Integrity Reference Manual applies to the following HUD programs:

1. Budget-based Service Coordinators (**B-b**),
2. Family Self-Sufficiency (**FSS**),
3. Housing Counseling (**HC**),
4. Housing Opportunities for Persons with AIDS (**HOPWA**),
5. Jobs Plus (**Jobs+**),
6. Juvenile Re-entry Assistance Program (**JRAP**),
7. Lead Based Paint Hazard Control (**LBPHC**),
8. Lead Hazard Reduction Demo (**LHRD**),
9. Multi-family Service Coordinator (**MFSC**), and
10. Resident Opportunity and Self-Sufficiency Service Coordinators Program (**ROSS**)

However, every Grantee and Service Coordinator is not required to report each and every data element. The description of each data element in this Guide will contain an indicator, yes (Y) or no (N) indicating which Grantees and Service Coordinators must report which data elements. For example, every Grantee and Service Coordinator must report a Duns Number for the organization winning the Grant Award.
