

## Our Work in South Carolina:

### State of South Carolina – COVID-Relief Funds and Disaster Recovery

#### **Community Development Block Grant- Disaster Recovery (CDBG-DR):**

NMA provided critical support to the State of South Carolina Disaster Recovery Office to help establish their CDBG-DR compliance program, reviewing internal policies and procedures, program guidelines, training materials, audit policies and procedures to ensure compliance.

#### **Community Development Block Grant - Coronavirus (CDBG-CV):**

NMA was an instrumental leader as part of the team that provided comprehensive grants management services for the State of South Carolina Department of Commerce, ensuring efficient administration, compliance, and accountability across all phases of grant programs. We supported the full lifecycle of Community Development Block Grant (CDBG-CV) programs, from initial planning through grant closeout. We assisted the State in drafting necessary action plan amendments to accommodate the changing regulatory landscape and funding priorities as the grant evolved.

#### **Emergency Rental Assistance Program (ERAP):**

As a subcontractor, NMA provided full administration and operation of the state's \$270 million Emergency Rental Assistance Program to SC Housing.

#### **Coronavirus Relief Fund (CRF):**

As a subcontractor, NMA assisted the State of South Carolina Department of Administration with the administration of the entire \$2 billion grant statewide; provide technical assistance and program operation. Assisted with the distribution of State-directed funding; validate compliance for use and expenditures (revenue loss, PPE reimbursement, etc.).

NMA led the monitoring of \$2 billion of CRF funding across 11 programs and 208 subrecipients, ensuring funds reached agencies, businesses, and communities efficiently. The NMA team effectively worked with the grantees in twenty-two (22) impacted counties to thoroughly understand current project position and compliance criteria. Based on our initial assessment, we developed a compliance and quality control monitoring plan for each project, while providing technical assistance throughout the process. We worked closely with the State Auditor's Office on the approach and methodology.

***Let's build a more resilient future - together!***
